

TWO TURBOS ARE BETTER THAN NONE!

INTRODUCING OUR 2016+ CHEVROLET CAMARO SS (LT1) TWIN TURBO SYSTEM

The most powerful option for the 2016+ Camaro SS is finally here! This top mount twin turbo system has taken the LT1 engine to new heights. The base system provides 5-6 psi to gain over 180-200whp! Modified fuel systems and supporting mods will allow over 1200whp to be made! This system is a true bolt-on. The Gen 6 now has the power adder it deserves!

System Highlights:

- » Top mount stainless turbo headers
- » Twin Precision 6266 CEA® turbos (v-band inlet)
- » Large vertical flow core intercooler (highest flow bar/plate core available)
- » Twin Precision 40mm wastegates (v-band inlet)
- » Dual blow-off valves standard
- » All necessary heat protection included in the system
