

TWO TURBOS ARE BETTER THAN NONE!

INTRODUCING OUR **2018+ FORD MUSTANG GT** TWIN TURBO SYSTEM

Hellion has introduced its awesome Eliminator Twin Turbo system for the 2018+ Mustang GT. The 2018 5.0L is the latest in a long line of legendary V8s. It can't hurt that it's faster and more powerful than any of the 5.0L engines to come before it – thanks to a new port fuel and direct injection. Give your pony the power it deserves!

System Highlights:

- » Top mount stainless turbo headers
- » Twin Precision 55mm or 62mm CEA® turbos (v-band inlet)
- » Large vertical flow core intercooler (highest flow bar/plate core available)
- » Twin Precision 46mm wastegates (v-band inlet)
- » Dual blow-off valves standard

🇺🇸 PROUDLY MADE IN THE U.S.A.
